Subject: Call From Louis Meeks
2014 12 09 Ranger.pdf

I just want to give you heads up. I'm copying Greg and Luke since Louis told me that he called them as well, but could not get through.

Louis Meeks just called me expressing frustration about a recent article in the Riverton Ranger with a headline "EPA asked state to assume Pavillion probe". I've attached the article. I don't know the details on how the transition was made from the EPA led study to the State led study, and I told him that.

He told me that he thinks Encana and the OGCC are lying when they say they have completed testing on the gas wells in the field; he said that he never saw any workover rigs when Encana claimed they were MIT testing. I don't know what that process requires so I can't comment on what that work would entail.

Overall, I tried to leave him with the message that folks here are trying to work with the state to get to a resolution on our work at Pavillion.

I just want to give you a heads up in the event you get a phone call from him,

Rob
